Work Experience

May 2014-Current | **Software Engineer Lead at BETTERWORKS**

I am a Software Engineer Lead at BetterWorks. I do full stack web development using Django and AngularJS. I lead a team of engineers which includes mentoring, code reviews, and pair programming. I have touched all parts of the product, helping rearchitect and rewrite much of the backend, as well as large parts of the frontend. I have also done extensive performance improvements in Python, JavaScript, and SQL.

Aug 2013-May 2014 | **Software Engineer at REDBEACON**

I was a Software Engineer at Redbeacon. I helped build Redbeacon Experts, a Q&A platform for home improvement questions using Django and AngularJS. I was also the technical lead on a project combining related accounts on Home Depot's backend.

Jun 2010-Current | **Co-founder and CEO at LOKO APPS**
iOS and Android App Developer

I started a company after my Freshman year of college called **Loko Apps**. I program iOS and Android apps using Marmalade SDK in **C++**. My most recent app is Gravity Evolved. My apps have over **1,400,000** downloads.

Jan 2012-Jul 2013 | **Jr. Software Engineer at SOFTWARE INVENTIONS (GOOGLE CHROME)**

We were contracted by Google to work on **Chrome**. I achieved both commiter and OWNER status in the Chromium repository, with over 200 commits, which can be seen here. I wrote the Chrome Extensions documentation server, which generates and serves the documentation at developer.chrome.com/extensions. I also started a project to load the Extensions API bindings lazily. This involved a lot of work on the browser internals using C++.

Education

June 2013 | Bachelor of Science in SOFTWARE ENGINEERING ***Summa Cum Laude***
California Polytechnic University, San Luis Obispo
GPA: 3.886/4.0 — MAJOR GPA: **3.946/4.0**

Languages/Programming Experience

Python	C++	Linux	Vim	AngularJS	jQuery
JavaScript	Go	SQL	Django	CoffeeScript	CSS/SASS/Less
C	Bash	Git	Flask	Java	

Personal Projects

clarkduvall.com | My personal website, which is a working Unix shell, implemented in JavaScript. Look there for more info about me and links to some of my other projects. Hit the #1 spot on Hacker News.

GITHUB | I have lots of side projects on my GitHub profile (@clarkduvall), many which are linked from clarkduvall.com.

Activities and Honors

1st Place - Amazon SLO Fall 2012 Programming Contest
Cal Poly Dean's List x12 (every quarter)
